Sommario/riassunto	In this new volume, Alan Rix examines the renewal of post-war contacts between Australia and Japan and the resolution of wartime issues in the 1950's. He shows how some major bilateral negotiations

highlight the tensions involved in forging a strong relationship, while extensive analysis of the machinery of diplomacy (the administrative, political and legal framework) indicates the depth of bilateral ties. Also covered are the close consultation and diplomatic dealings over the decades and the personal connections between leaders.
