	Sommario/riassunto	This IBM Redbooks publication provides IT architects, IT specialists, and developers with the critical knowledge to design, develop, implement, deploy, and manage a WebSphere Commerce V5.5 runtime environment and store. This book includes the following: Introduction to the WebSphere Commerce runtime architecture, programming model, business and store models. Development guidelines for a e-commerce development methodology, development environment, build cycle, and globalization. ITSO B2B working example, including a business requirements analysis and solution design, and how to implement a team development environment, create and customize a store, and build, deploy, and manage a store. Deployment scenarios for implementing advanced multi-tiered runtime scenarios on Windows, Solaris, AIX and OS/400. Integration and customization with MQ, e-mail and WebSphere Commerce Analyzer. The appendixes include procedures and tips on AIX, Solaris, DB2, Oracle and WebSphere Commerce Studio implementation. Please note that the additional material referenced in the text is not available from IBM.
