1.	Record Nr.	UNINA9910449844403321
	Autore	Darmawan Budi
	Titolo	WebSphere Studio Application Monitor V3.2 advanced usage guide [[electronic resource] /] / Budi Darmawan ... [et al.]
	Pubbl/distr/stampa	Austin, TX, : IBM, International Technical Support Organization, 2005
	Edizione	[1st ed.]
	Descrizione fisica	1 online resource (218 p.)
	Collana	Redbooks
	Disciplina	005.3/76
	Soggetti	Web servers - Computer programs Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	"This edition applies to Version 3, Release 2 of WebSphere Studio Application Monitor (product numbers 5724-K79, 5697-J18, 5697-J17, and 5697-J01)."
	Nota di bibliografia	Includes bibliographical references and index.
	Sommario/riassunto	The addition of WebSphere Studio Application Monitor to the Tivoli product portfolio enhanced Tivoli offerings for application management. WebSphere Studio Application Monitor enables comprehensive monitoring and management of J2EE-based applications with their back-end platforms. This IBM Redbooks publication demonstrates advanced uses of WebSphere Studio Application Monitor to solve day-to-day operational problems. The book is intended for system administrators who want to use WebSphere Studio Application Monitor for monitoring Web-based applications. We do not discuss implementation issues in this book. We present WebSphere Studio Application Monitor concepts and offer usage details such as: - System administration of day-to-day operations, from grouping and security design to maintenance tasks. - Problem determination for WebSphere-based applications to assist with common problems that may occur in your environment. - Management and analysis of composite applications, which span multiple application servers and can be hard to manage, with demonstrations of composite applications across J2EE servers, CICS, and IMS. Please note that the additional material referenced in the text is not available from IBM.
