Sommario/riassunto	UN Contributions to Development Thinking and Practice is at once a history of the ideas and realities of international development, from the classical economists to the recent emphasis on human rights, and a history of the UN's role in shaping and implementing development paradigms over the last half century. The authors, all

prominent in the field of development studies, argue that the UN's founding document, the UN Charter, is infused with the human values and human   concerns that are at the center of
