| Sommario/riassunto | In recent years, we have witnessed an explosive growth in multimediacomputing, communication and applications. This revolution istransforming the way people live, work and interact with each other,and is impacting the way business, government services, education,entertainment and health care operate. This important book summarizes recent research topics, focusing onfour major areas: (1) intelligent content-based information retrievaland virtual world, (2) quality-of-services of multimedia data, (3)intelligent techniques for distance education, and (4) intelligentagents for e-commerce. |
