

1. Record Nr.	UNINA9910449882203321
Titolo	Digital Preservation in Libraries . part 2 [[electronic resource]]
Pubbl/distr/stampa	Bradford, England, : Emerald Group, c2004
ISBN	1-280-51438-8 9786610514380 1-84544-174-5
Descrizione fisica	1 online resource (45 p.)
Collana	The Journal of Information and Knowledge Management Systems. No.2 ; ; Vol. 34
Disciplina	025.06 025.06971
Soggetti	Digital preservation Library materials - Digitization Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Contents; Abstracts & keywords; The role of format in digital preservation; Practical experiences of the Dutch digital preservation test-bed; The preservation of databases; Digital preservation of audio, video and film; ERPANET: a European platform for enabling digital preservation; The digital preservation coalition; Further reading
Sommario/riassunto	The concept of representation format permeates all technical aspects of digital repository architecture and is, therefore, the foundation of many, if not all, digital preservation activities. Digital formats need to be understood both as general classes of encodings and in the specific instances of digital objects. The Digital Library Foundation (DLF) has sponsored an initial investigation into the creation of a global digital format registry (GDRF) to maintain format representation information. Using such information, ancillary tools and services can be created for additional repository and p
