Sommariorriassunto

The new millennium began with the triumph of democracy and markets. But for whom is life just, how so, and why? And what is being done to correct persisting injustices? Blending macro-level global and national analysis with in-depth grassroots detail, the contributors highlight roots of injustices, how they are perceived, and efforts to alleviate them. Following up on issues raised in the groundbreaking best-seller *Power and Popular Protest: Latin American Social Movements* (California, 2001), these essays elucidate how conceptions of justice are socially constructed and contested and historically contingent, shaped by people's values and institutionally grounded in real-life experiences. The contributors, a stellar coterie of North and Latin American scholars, offer refreshing new insights that deepen our understanding of social justice as ideology and practice.

Sommario/riassunto

In medieval Europe, the death of a king could not only cause a dispute about the succession, but also a severe crisis. In times of a vacant throne particular responsibility fell to the bishops - whose general importance for the time around the first millennium has been revealed by recent scholarship - as royal counsellors and policy makers. This volume therefore concentrates on the bishops' room for manoeuvre and the patterns of episcopal power, focusing on the Eastern Frankish Reich and Anglo-Saxon England in a comparative approach which is not least based upon the research of a renowned medie
