

1. Record Nr.	UNINA9910449902003321
Titolo	Head and neck cancer [[electronic resource] /] / edited by Bruce Brockstein, Gregory Masters
Pubbl/distr/stampa	Boston, : Kluwer Academic, c2003
ISBN	0-306-48060-3
Edizione	[1st ed. 2003.]
Descrizione fisica	1 online resource (X, 376 p.)
Collana	Cancer treatment and research ; ; 114
Altri autori (Persone)	BrocksteinBruce MastersGregory
Disciplina	616.99/491
Soggetti	Head - Cancer Neck - Cancer Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Overview of Head and Neck Cancer -- Epidemiology, Staging, and Screening of Head and Neck Cancer -- Oral Preneoplasia and Chemoprevention of Squamous Cell Carcinoma of the Head and Neck -- Early Stage Head and Neck Cancer — Surgery -- Radiation Therapy in the Management of Early-Stage Head and Neck Cancer -- Advanced Head and Neck Cancersurgery and Reconstruction -- Modified Fractionated Radiotherapy in Head and Neck Squamous Cell Carcinoma (HNSCC) & Re-Irradiation in Recurrent Head and Neck Carcinomas -- Organ Preservation-Induction Chemotherapy -- Organ Preservation for Advanced Head and Neck Cancer Concomitant Chemoradiation -- Unresectable, Locoregionally Advanced Head and Neck Cancer -- Nasopharyngeal Cancer -- Treatment of Metastatic Head and Neck Cancer: Chemotherapy and Novel Agents -- New Therapies for Locoregionally Advanced and Locoregionally Recurrent Head and Neck Cancer -- Quality of Life and Late Toxicities in Head and Neck Cancer -- Oral, Dental, and Supportive Care in the Cancer Patient.
Sommario/riassunto	Exciting advances are occurring in the understanding of the molecular pathogenesis of squamous head and neck cancers. Epidemiology, staging and screening, as well as premalignancy, chemoprevention and the molecular biology of head and neck cancer, lay the groundwork for

the understanding of the clinical chapters that follow. Controversial treatments will be compared to the standard management of patient care. Therapy chapters are divided into stage or category specific (resectable advanced, unresectable advanced or metastatic) problems, allowing the reader to review the current standards and options for patient types or specific patients easily. Considerations of supportive care, late toxicities and quality of life, often overlooked are reviewed in detail. This is a comprehensive summary of the current state of the art research and treatment.
