

1. Record Nr.	UNINA9910449954103321
Autore	Chen Yixin <1972->
Titolo	Machine learning and statistical approaches to image retrieval [[electronic resource] /] / Yixin Chen, Jia Li, James Z. Wang
Pubbl/distr/stampa	Boston ; ; London, : Kluwer Academic Publishers, c2004
Edizione	[1st ed. 2004.]
Descrizione fisica	1 online resource (XVII, 182 p.)
Collana	Kluwer international series on information retrieval ; ; 14
Altri autori (Persone)	LiJia <1974-> WangJames Z. <1972->
Disciplina	621.367
Soggetti	Image processing - Digital techniques Machine learning Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Image Retrieval and Linguistic Indexing -- Machine Learning and Statistical Modeling -- A Robust Region-Based Similarity Measure -- Cluster-Based Retrieval by Unsupervised Learning -- Categorization by Learning and Reasoning with Regions -- Automatic Linguistic Indexing of Pictures -- Modeling Ancient Paintings -- Conclusions and Future Work.
Sommario/riassunto	In the early 1990s, the establishment of the Internet brought forth a revolutionary viewpoint of information storage, distribution, and processing: the World Wide Web is becoming an enormous and expanding distributed digital library. Along with the development of the Web, image indexing and retrieval have grown into research areas sharing a vision of intelligent agents. Far beyond Web searching, image indexing and retrieval can potentially be applied to many other areas, including biomedicine, space science, biometric identification, digital libraries, the military, education, commerce, culture and entertainment. Machine Learning and Statistical Modeling Approaches to Image Retrieval describes several approaches of integrating machine learning and statistical modeling into an image retrieval and indexing system that demonstrates promising results. The topics of this book reflect authors' experiences of machine learning and statistical modeling

based image indexing and retrieval. This book contains detailed references for further reading and research in this field as well.
