

1. Record Nr.	UNINA9910450031103321
Autore	Ojima Minoru
Titolo	Noble gas geochemistry // Minoru Ozima, Frank A. Podosek [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2002
ISBN	1-107-12343-7 0-511-04160-8 1-280-43331-0 9786610433315 0-511-17633-3 0-511-15711-8 0-511-32953-9 0-511-54598-3 0-511-04382-1
Edizione	[Second edition.]
Descrizione fisica	1 online resource (xiv, 286 pages) : digital, PDF file(s)
Disciplina	551.9
Soggetti	Gases, Rare Geochemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. 253-280) and index.
Nota di contenuto	; Chapter 2 Physical Chemistry ; 30 -- ; Chapter 3 Cosmochemistry ; 81 -- ; Chapter 4 Water ; 98 -- ; Chapter 5 Crust ; 123 -- ; Chapter 6 Mantle ; 160 -- ; Chapter 7 Noble Gases in the Earth ; 217.
Sommario/riassunto	Noble Gas Geochemistry discusses the fundamental concepts of using noble gases to solve problems in the earth and planetary sciences. The discipline offers a powerful and unique tool in resolving problems such as the origin of the solar system, evolution of the planets, earth formation, mantle evolution and dynamics, atmospheric degassing and evolution, ocean circulation, dynamics of aquifer systems, and numerous applications to other geological problems. This book gives a comprehensive description of the physical chemistry and cosmochemistry of noble gases, before leading on to applications for problem-solving in the earth and planetary sciences. There have been

many developments in the use of the noble gases since publication of the first edition of this book in 1983. This second edition has been fully revised and updated. The book will be invaluable to graduate students and researchers in the earth and planetary sciences who use noble gas geochemistry techniques.
