Sommario/riassunto	In this penetrating examination of African American politics and

culture, Paul Ortiz throws a powerful light on the struggle of black Floridians to create the first statewide civil rights movement against Jim Crow. Concentrating on the period between the end of slavery and the election of 1920, *Emancipation Betrayed* vividly demonstrates that the decades leading up to the historic voter registration drive of 1919-20 were marked by intense battles during which African Americans struck for higher wages, took up arms to prevent lynching, forged independent political alliances, boycotted segregated streetcars, and created a democratic historical memory of the Civil War and Reconstruction. Contrary to previous claims that African Americans made few strides toward building an effective civil rights movement during this period, Ortiz documents how black Floridians formed mutual aid organizations-secret societies, women's clubs, labor unions, and churches-to bolster dignity and survival in the harsh climate of Florida, which had the highest lynching rate of any state in the union. African Americans called on these institutions to build a statewide movement to regain the right to vote after World War I. African American women played a decisive role in the campaign as they mobilized in the months leading up to the passage of the Nineteenth Amendment. The 1920 contest culminated in the bloodiest Election Day in modern American history, when white supremacists and the Ku Klux Klan violently, and with state sanction, prevented African Americans from voting. Ortiz's eloquent interpretation of the many ways that black Floridians fought to expand the meaning of freedom beyond formal equality and his broader consideration of how people resist oppression and create new social movements illuminate a strategic era of United States history and reveal how the legacy of legal segregation continues to play itself out to this day.

Sommario/riassunto	Taking its inspiration from the 50th anniversary of the publication of

Festinger and others's 1956 seminal and controversial volume *When Prophecy Fails*, which introduced the notion of 'cognitive dissonance' as an explanation for how a small group of flying saucer devotees handled the failure of a predicted visit from space aliens, this volume looks at both theoretical and empirical studies of religious groups for whom space beings and civilizations provided an inspiration to prepare for the nearness of events that would trigger 'the end of the world.' Rather than examining merely the rationales adopted to account for the disappointments associated with such 'failures,' the core of the present volume seeks to explore the dynamics that inspire not only such beliefs but also the vigorous participation in activities in which adherents engage to prepare for the coming of (or transport to) alien civilizations from 'outer space.'
