The Immigrant Niche: Pervasive, Persistent, Diverse -- 8. Progress, Decline, Stagnation?: The New Second Generation Comes of Age -- 9. Conclusion: Immigration and the Remaking of Urban America -- Notes on Contributors -- Index
Sommario/riassunto	Immigration is remaking the United States. In New York, Los Angeles, Miami, San Francisco, and Chicago, the multiethnic society of tomorrow is already in place. Yet today's urban centers appear unlikely to provide newcomers with the same opportunities their predecessors found at the turn of the last century. Using the latest sources of information,

this hard-hitting volume of original essays looks at the nexus between urban realities and immigrant destinies in these American cities. *Strangers at the Gates* tells the real story of immigrants' prospects for success today and delineates the conditions that will hinder or aid the newest Americans in their quest to get ahead. This book stresses the crucial importance of understanding that immigration today is fundamentally urban and the equally important fact that immigrants are now flocking to places where low-skilled workers--regardless of ethnic background--are in particular trouble. These two themes are at the heart of this book, which also covers a range of provocative topics, often with surprising findings. Among the essayists, Nelson Lim enters the controversy over whether and how immigrants affect the employment prospects for African Americans; Mark Ellis investigates whether low immigrant wages depress other workers' salaries; William A.V. Clark contends that immigrants seem to be experiencing downward mobility; and Min Zhou asserts that trends among second-generation immigrants are decidedly more optimistic. These well-integrated and well-organized essays sit squarely at the intersection of sociology and economics, and along the way they point out both the strengths and the weaknesses of these two disciplines in understanding immigration. Providing a theoretically and empirically comprehensive overview of the economic fate of immigrants in major American cities, this book will make a major contribution to debates over immigration and the American future.

Sommario/riassunto

Argumentation, which has long been a topic of study in philosophy, has
 become a well-established aspect of computing science in the last 20
 years. This book presents the proceedings of the fifth conference on
 Computational Models of Argument (COMMA), held in Pitlochry,
 Scotland in September 2014. Work on argumentation is broad, but the
 COMMA community is distinguished by virtue of its focus on the
 computational and mathematical aspects of the subject. This focus
 aims to ensure that methods are sound - that they identify arguments
 that are correct in some sense - and provide an unambiguous speci

Nota di contenuto	1. Indonesian Economy in Time of Covid: Surviving the Turmoil through Manufacturing Sector -- 2. Post-COVID Recovery: Harnessing Digital Platforms -- 3. A Better Match: Do technology gaps with foreign subsidiaries affect domestic firms' productivity? Case Study of Indonesian Manufacturing -- 4. International Trade and Human Development Convergence: The Tale of ASEAN -- 5. From Trade and Foreign Direct Investment to Technology: International R&D Spillovers and Productivity in ASEAN -- 6. Labor Productivity, Bilateral Trade, and Institutional Quality in ASEAN 6 Countries: Gravity Approach -- 7. Free Trade Agreement (FTA), Upgrading Quality, and Economies of Scale -- 8. ASEAN Outlook of Indo-Pacific: Pushing all the wheels to gain regional sustainability.

This book provides unique insight into economic development within the ASEAN region and its recovery from the COVID-19 pandemic. With a particular focus on Indonesia, it highlights the historic importance of manufacturing within the region and how the sector remains vital, despite the Asian financial crisis, and central to sustainable and inclusive economic growth. The growing influence of digital technologies, including remote work, online services, and digital marketplaces, are highlighted, particularly in relation to economic mitigation and recovery from the COVID-19 pandemic. Broader issues, such as FDI, human development, regional integration, R&D spillovers, labour productivity, and bilateral trade, are also discussed. This book highlights how ASEAN economies can be strengthened by innovation, trade, and increased productivity. It will be relevant to students and researchers interested in development and international economics. Fithra Faisal Hastiadi is a researcher at the University of Indonesia and Executive Director at Next Policy.
