

1. Record Nr.	UNINA9910450108103321
Titolo	HIV transmission through breastfeeding [[electronic resource] ] : a review of available evidence / / UNICEF, UNAIDS, WHO, UNFPA
Pubbl/distr/stampa	Geneva, Switzerland, : World Health Organization, c2004
ISBN	1-280-14133-6 9786610141333 1-4175-7760-6 92-4-068068-3
Descrizione fisica	1 online resource (31 p.)
Disciplina	362.196/9792
Soggetti	HIV infections - Transmission Infants - Nutrition Infants - Health and hygiene Breastfeeding - Health aspects AIDS (Disease) in infants - Prevention Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 21-25).
Nota di contenuto	Preliminaries; Contents; Acknowledgements; Glossary of terms; Executive summary; Introduction; Background; Mother to child transmission; HIV transmission through breastfeeding; Preventing transmission through breastfeeding; Current or planned research; References
Sommario/riassunto	This book presents a summary of the available scientific evidence on the transmission of HIV infection through breastfeeding. It briefly describes the benefits of breastfeeding for both mothers and infants; and summarizes evidence on the relative risk of mother-to-child transmission of HIV-1 infection during pregnancy, delivery, and breastfeeding.
