Sommario/riassunto	We were very pleased to be asked to edit this special issue of the Journal on the topic of International Developments in e-Learning, which has become one of the most widely discussed issues in education and training. E-learning is forecast to be one of the most important developments in transforming the landscape of education and training over the next decade as the power of information and computing technologies grow.Previously published in: Education + Training, Volume 46, Number 6/7, 2004
