Sommario/riassunto	In this book, John Lea develops a broad historical and sociological overview relating the rise and fall of effective crime control to different types of social structures. It traces the process of modernisation and industrialisation from the eighteenth to the mid twentieth centuries which established the social preconditions for effective control and management of criminality. In the early years of the present century it is clear that these preconditions are now being progressively

undermined as industrial society undergoes profound changes in its direction of development.
