

1. Record Nr.	UNINA9910450490003321
Titolo	DFSMStvs overview and planning guide [[electronic resource] /] / [Nigel Morton ... et al.]
Pubbl/distr/stampa	San Jose, CA, : IBM, International Technical Support Organization, 2003
Edizione	[1st ed.]
Descrizione fisica	xviii, 234 p. : ill
Collana	IBM redbooks
Altri autori (Persone)	MortonNigel
Disciplina	004.5
Soggetti	Virtual storage (Computer science) CICS (Computer system) Electronic data processing - Batch processing Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"June 2003." "SG24-6971-00."
Nota di bibliografia	Includes bibliographical references (p. 227-228) and index.
Sommario/riassunto	This IBM Redbooks publication describes how DFSMStvs works, how and when you might use it, and what you need to consider in your plans. This book should be of interest to you if you want to understand how you can increase the service hours of a CICS/VSAM system by reducing or eliminating the batch window, or if you want to run multiple concurrent batch jobs updating common VSAM data sets. This book is written for readers who have some knowledge of CICS, VSAM, and VSAM Record Level Sharing, and who wish to understand more about DFSMStvs. The book reviews how existing products work. It introduces DFSMStvs, offering more detail on how it works, how you might migrate to it, and how you can change your applications or write new applications to exploit it. This is a companion volume to the DFSMStvs Application Migration Guide, SG24-6972, which contains practical examples of migrating programs to run in a DFSMStvs environment, and the DFSMStvs Presentation Guide, SG24-6973, which contains an overview presentation of DFSMStvs.
