Sommario/riassunto	This work reveals the hitherto unrepresented relationship that developed between Scotland and Sweden during the second half of the sixteenth and first half of the seventeenth centuries. Sweden's emergence as an independent Nordic, and indeed European, power required continual military and economic growth, which in turn

necessitated a constant supply of manpower. The initially piecemeal migration of private individuals from Scotland bringing both martial and mercantile skills to Sweden gradually grew into an informal alliance, albeit officially sanctioned by the Swedes, based on personal networks. Equally the impact of Sweden's support for the Scottish Covenanting movement on British state-formation is scrutinized. This fresh perspective on Scottish-Swedish connections is aimed at those interested in state-formation, migration studies, diplomatic developments, and military history.

## Sommario/riassunto

What should a catalogue of archaeological material contain? This book is a comprehensive index of 210 lamps from the Roman fort of Gerulata (present-day Bratislava-Rusovce, Slovakia) and its adjoining civilian settlement. The lamps were excavated during the last 50 years from the houses, cemeteries, barracks and fortifications of this Roman outpost on the Limes Romanus and span almost three centuries from AD 80 to AD 350. For the first time, they are published in full and in color with detailed analysis of lamp types, workshop marks and discus scenes. Roman lamps were a distinctive form of int
