Nota di contenuto	Build-up to war and genocide : society and economy in Rwanda and eastern Zaire -- Mind the gap : how the international press reported on society, politics, and history -- For beginners, by beginners : knowledge construction under the Rwandese Patriotic Front -- Labelling refugees : international aid and the discourse of genocide -- Masterclass in surreal diplomacy : understanding the culture of "political correctness" -- Land and social development : challenges, proposals, and their imagery.
Sommario/riassunto	The tragic conflict in Rwanda and the Great Lakes in 1994-1996 attracted the horrified attention of the world's media. Journalists, diplomats and aid workers struggled to find a way to make sense of the bloodshed. Johan Pottier's troubling study shows that the post-genocide regime in Rwanda was able to impose a simple yet persuasive

account of Central Africa's crises upon international commentators new to the region, and he explains the ideological underpinnings of this official narrative. He also provides a sobering analysis of the way in which this simple, persuasive, but fatally misleading analysis of the situation on the ground led to policy errors that exacerbated the original crisis. Professor Pottier has extensive field experience in the region, from before and after the genocide, and he has also worked among refugees in eastern Zaire.

Sommario/riassunto

The gay community has been hit hard by the AIDS epidemic in the United States and in much of Europe; as a result, the gay and lesbian community has been forced to examine existing notions of what it means to be gay and to belong to a community based on sexual orientation. This book explores gay and lesbian sexual behaviour, personal identity and community membership from diverse perspectives. Chapters report the authors' own AIDS-related research and include discussions of AIDS in both large urban centres, such as New York and San Francisco, and in less populated settings outside
