

1. Record Nr.	UNINA9910450511803321
Titolo	Chronic complications in diabetes : animal models and chronic complications / / edited by Anders A.F. Sima
Pubbl/distr/stampa	Amsterdam, The Netherlands : , : Harwood Academic, , 2000
ISBN	0-429-07922-2 1-4822-9823-6 1-280-05763-7 9786610057634 661005763X 0-203-30380-6
Descrizione fisica	1 online resource (289 p.)
Collana	Frontiers in animal diabetes research, , 1029-841X ; ; v. 1
Altri autori (Persone)	SimaAnders A. F
Disciplina	616.4/62027
Soggetti	Diabetes - Complications - Animal models Diabetes - Treatment Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Book Cover; Title; Contents; Preface to the Series; Preface; Contributors; Diabetic Animals for Research into the Complications: A General Overview; Studies in Animal Models on the Role of Glycation and Advanced Glycation End-Products (AGEs) in the Pathogenesis of Diabetic Complications: Pitfalls and Limitations; Utility of the Transgenic Mouse in Diabetes Research; Oxidative Stress and Abnormal Lipid Metabolism in Diabetic Complications; Diabetic Neuropathy in Various Animal Models; Neurotrophism in Diabetic Neuropathy Diabetes Mellitus: Evidence for Altered Calcium Signaling in Excitable TissuesExperimental Diabetic Nephropathy; Diabetic Retinopathy in Experimental Animal Models and their Feasibility for Understanding the Human Disease; Fetal Malformations in Diabetes; Index
Sommario/riassunto	Individual volumes in the series <i>Frontiers in Animal Diabetes Research</i> provide basic researchers as well as clinical investigators with in-depth coverage of basic experimental diabetes research. Each volume will be topic oriented with timely and liberally referenced reviews. The series

will provide a valuable reference source for basic researchers as well as clinical investigators, graduate students and research fellows in the areas of diabetology, endocrinology, physiology, and pharmacology. Major advances have been made in diabetes research, partly as a result of experimentation in animal mo
