Sommario/riassunto	The world is at risk and the supply chain is not exempt Supply risk used to be defined as the potential for strikes by transport workers, fires at a key supplier's plant, or missed deliveries. That simple vision no longer applies. For the last 50 years, the global economies have benefited from the stability afforded by Pax Group of Seven - the longest period of uninterrupted economic advance.Previously published in: Physical Distribution and Logistics Management, Volume 34, Number 9, 2004
