Autore	Palazzo, Francesco <1947->
Titolo	Oltraggio, scriminante degli atti arbitrari, aggravante di cui all'art. 61 n. 10 c.p. e attenuante della provocazione / Francesco Carlo Palazzo
Pubbl/distr/stampa	Torino : Utet, 1971
Descrizione fisica	34 p. ; 20 cm
Disciplina	345
Locazione	FGBC
Collocazione	BUSTA 5 (26) 26
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Estratto da "Giurisprudenza Italiana" 1971
2. Record Nr.	UNINA9910450525803321
Autore	Donnachie Sandy <1936->
Titolo	Pomeron physics and QCD // Sandy Donnachie [and others] [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2002
ISBN	1-107-12897-8 1-280-41788-9 9786610417889 1-139-14639-4 0-511-16995-7 0-511-06681-3 0-511-06050-5 0-511-29708-4 0-511-53493-0 0-511-06894-8
Descrizione fisica	1 online resource (xi, 347 pages) : digital, PDF file(s)
Collana	Cambridge monographs on particle physics, nuclear physics, and cosmology ; ; 19
Disciplina	539.7/21
Soggetti	Regge theory Pomerons Quantum chromodynamics

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. 327-342) and index.
Nota di contenuto	Properties of the S-matrix -- Regge poles -- Introduction to soft hadronic processes -- Duality -- Photon-induced processes -- QCD: perturbative and nonperturbative -- Hard processes -- Soft diffraction and vacuum structure -- Dipole approach -- Questions for the future -- ; Appendix A: Sommerfeld-Watson transform -- ; Appendix B: The Group SU(3) -- ; Appendix C: Feynman rules of QCD -- ; Appendix D: Pion-nucleon amplitudes -- ; Appendix E: The density matrix of vector mesons.
Sommario/riassunto	This book describes the underlying ideas and modern developments of Regge theory, confronting the theory with quantum chromodynamics and a huge variety of experimental data. It covers forty years of research and provides a unique insight into the theory and its phenomenological development. The authors review experiments that suggest the existence of a soft pomeron, and give a detailed discussion of attempts at describing this through nonperturbative quantum chromodynamics. They suggest that a second, hard pomeron is responsible for the dramatic rise in energy observed in deep inelastic lepton scattering. The two-pomeron hypothesis is applied to a variety of interactions and is compared and contrasted with perturbative quantum chromodynamics, as well as with the dipole approach. This book will provide a valuable reference for experimental particle physicists all over the world. It is also suitable for graduate courses in particle physics, high-energy scattering, QCD and the standard model.

Sommario/riassunto

This book, published in 1886, addresses the critical issue of housing shortages faced by poorer classes in major German cities. Compiled by the Verein für Socialpolitik, it presents a series of reports and expert opinions on existing housing conditions and efforts for improvement. The text explores legal frameworks, societal efforts, and economic factors contributing to housing challenges. It provides comparative insights from Germany and England, highlighting legislative measures and social reforms aimed at alleviating these conditions. The book is intended for policymakers, social reformers, and scholars interested in urban development and social welfare. It seeks to inform and prompt legislative and community action to address housing inadequacies and improve living conditions for the working class.
