Sommario/riassunto	The past five decades have witnessed often fierce international rivalry in space, but also surprising military restraint. Now, with an increasing number of countries capable of harming U.S. space assets, experts and officials have renewed a long-standing debate over the best route to space security. Some argue that space defenses will be needed to protect critical military and civilian satellites. Others argue that space should be a ""sanctuary"" from deployed weapons and military conflict, particularly given the worsening threat posed by orbital space debris. Moltz puts this debate in

Sommario/riassunto	This volume is a companion to the author's new Loeb edition of Seneca's tragedies (vol. 1, 2002; volume 2, 2004). It offers reasons for his editorial choices, and explains his interpretations of the text as reflected in his translation. Hercules Oetanus and Octavia , now generally regarded as imitations of Senecan drama, are both included. The volume is intended to be read alongside Otto Zwierlein's Kritische Kommentar , published in 1986. In the intervening years there has

been much new work pertaining to Seneca's text, including full-scale editions with commentary on individual plays, such as Keulen's *Troades* , Töchterle's *Oedipus* and Ferri's *Octavia* . *Annaeana Tragica* seeks to supplement and advance Zwierlein's work in the light of this new material. An appendix reviews the scholarly controversy concerning the anapaestic odes of these plays, and offers fresh evidence relevant to the issue.

Sommario/riassunto

This volume consists of a set of ten lectures conceived as both introduction and up-to-date survey on discrete integrable systems. It constitutes a companion book to "Integrability of Nonlinear Systems" (Springer-Verlag, 2004, LNP 638, ISBN 3-540-20630-2). Both volumes address primarily graduate students and nonspecialist researchers but will also benefit lecturers looking for suitable material for advanced courses and researchers interested in specific topics.
