Sommario/riassunto	This comprehensive volume covers the most recent advances in the field of spin physics, including the latest research in high energy and nuclear physics and the study of nuclear spin structure. The comprehensive coverage also includes polarized proton and electron acceleration and storage as well as polarized ion sources and targets. Many significant new results and achievements on the different topics considered at the symposium are presented in this book for the first time.

Sommario/riassunto	Examining the industrial ecology of 200 years of ironmaking with renewal energy resources in northwestern Connecticut, this text focuses on the cultural context of people's decisions about technology and the environment, and the gradual transition they effected in their land from industrial landscape to pastoral countryside.
