| Titolo | Vortex dominated flows [[electronic resource] ] : a volume celebrating Lu Ting's 80th birthday / / edited by Denis Blackmore, Egon Krause, Chee Tung |
| Pubbl/distr/stampa | Singapore ; ; Hackensack, NJ ; ; London, : World Scientific, c2005 |
| ISBN | 1-281-90580-1<br>9786611905804<br>981-270-343-8 |
| Descrizione fisica | 1 online resource (300 p.) |
| Altri autori (Persone) | TingL <1925-> (Lu)<br>BlackmoreDenis L<br>KrauseE <1933-> (Egon)<br>TungC <1936-> (Chee) |
| Disciplina | 532/.0595 |
| Soggetti | Viscous flow - Mathematics<br>Vortex-motion - Mathematics<br>Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references. |
| Nota di contenuto | Contents; Preface; Foreword by Joeseph B . Keller; 1 . Circular Discrepancy and a Monte Carlo Algorithm for Generating a Low Circular Discrepancy Sequence; 2 . Periodic and Quasiperiodic Motion of Point Vortices; 3 . Experiments on Heave/Pitch Limit-Cycle Oscillations of a Supercritical Airfoil Close to the Transonic Dip; 4 . Vortices in Superconductors; 5 . Accurate Numerical Simulation of Three-dimensional Lid-driven Cavity Flows with Different Span Lengths; 6 . Geometric, Stochastic and Algebraic Vortices<br>7 . Experimental Investigation & Numerical Simulation of Oblique Shock/Vortex Interaction8 . Breakdown of Slender Vortices: The State of the Art; 9 . A Numerical Analysis of Vortex Dislocation in Wake-type Flow with Different Spanwise Nonuniformity; 10 . Vortex Dipole Coordinates on the Sphere; 11 . Magneto-Fluid-Dynamic Flow Control; 12 . Interaction between Longitudinal Vortices and Normal and Oblique Shocks; 13 . Analysis of Rotor Vortex Wake Structure Using 3-C PIV |

| | |
|---|---|
| | Measurements; 14 . Typical Vortex Phenomena in Flow Fields Past Space Vehicles |
| Sommario/riassunto | Honoring the contributions of one of the field's leading experts, Lu Ting, this indispensable volume contains important new results at the cutting edge of research. A wide variety of significant new analytical and numerical results in critical areas are presented, including point vortex dynamics, superconductor vortices, cavity flows, vortex breakdown, shock/vortex interaction, wake flows, magneto-hydrodynamics, rotary wake flows, and hypersonic vortex phenomena. The book will be invaluable for those interested in the state of the art of vortex dominated flows, both from a theoretical and appl |
