

1. Record Nr.	UNINA9910450695803321
Autore	Gregory Jane <1962->
Titolo	Fred Hoyle's universe [[electronic resource] /] / Jane Gregory
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2005
ISBN	1-280-75888-0 0-19-151358-X 1-4294-5987-5
Descrizione fisica	1 online resource (417 p.)
Disciplina	520.92
Soggetti	Astronomers - Great Britain Authors, English - 20th century Communication in science - Great Britain Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [342]-391) and index.
Nota di contenuto	Contents; Acknowledgements; 1 Coming to light; 2 Hut no. 2; 3 Into the limelight; 4 New world; 5 Under fire; 6 New Genesis; 7 Eclipsed; 8 Fighting for space; 9 Storm clouds; 10 'Dear Mr Hogg'; 11 His institute; 12 The end of the beginning; 13 The Astronomer Hoyle; 14 The beginning of the end; 15 On the loose; 16 Apocalyptic visions; 17 Evolution on trial; 18 A new cosmology; References; Picture acknowledgements; Index
Sommario/riassunto	Fred Hoyle was a down-to-earth, argumentative Yorkshireman who became the voice of British astronomy. For fifty years, he spoke out for astronomy in the newspapers, on government committees, at scientific meetings, in popular books and on the radio. He devised the steady-state theory of the universe and worked out how the elements are formed in the nuclei of stars. He also founded a prestigious institute, led the project to build a giant telescope and, if it rained on his summer. holiday, he sat in his caravan and wrote science fiction novels for his legions of fans around the world. This book
