1. Record Nr. UNINA9910450697803321

Autore	Revesz Pal
Titolo	Random walk in random and non-random environments [[electronic resource] /] / Pal Revesz
Pubbl/distr/stampa	Hackensack, N.J., : World Scientific, c2005
ISBN	1-281-90576-3 9786611905767 981-270-336-5
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (397 p.)
Disciplina	519.2/82
Soggetti	Random walks (Mathematics) Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 357-373) and indexes.
Nota di contenuto	Preface to the First Edition; Preface to the Second Edition; Contents; Introduction; I. SIMPLE SYMMETRIC RANDOM WALK IN Z1; II.SIMPLE SYMMETRIC RANDOM WALK IN Zd; III. RANDOM WALK IN RANDOM ENVIRONMENT; References; Author Index; Subject Index
Sommario/riassunto	The simplest mathematical model of the Brownian motion of physics is the simple, symmetric random walk. This book collects and compares current results - mostly strong theorems which describe the properties of a random walk. The modern problems of the limit theorems of probability theory are treated in the simple case of coin tossing. Taking advantage of this simplicity, the reader is familiarized with limit theorems (especially strong ones) without the burden of technical tools and difficulties. An easy way of considering the Wiener process is also given, through the study of the random walk.
