Sommario/riassunto

In the 1970s and 1980s many institutions, agencies and scholars believed that the Himalayan region was facing severe environmental disaster, due primarily to rapid growth in population that has caused extensive deforestation, which in turn has led to massive landsliding and soil erosion. This series of assumptions was first challenged in the book: *The Himalayan Dilemma* (1989: Ives and Messerli, Routledge). Nevertheless, the environmental crisis paradigm still commands considerable support, including logging bans in the mountain watersheds of China, India, and Thailand, and is constant
