

1. Record Nr.	UNINA9910450784603321
Autore	Patrick Graham L.
Titolo	Organic chemistry // G. L. Patrick
Pubbl/distr/stampa	New York, New York ; ; London, [England] : , : Garland Science, , 2012 ©2012
ISBN	1-280-09924-0 9786610099245 0-203-42761-0
Edizione	[Second edition.]
Descrizione fisica	1 online resource (362 p.)
Collana	BIOS Instant Notes
Disciplina	547
Soggetti	Chemistry, Organic Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Title Page; Table of Contents; Preface; Section A - Structure and bonding; A1 Atomic structure of carbon; A2 Covalent bonding and hybridization; A3 sp ³ Hybridization; A4 sp ² Hybridization; A5 sp Hybridization; A6 Bonds and hybridized centers; Section B - Alkanes and cycloalkanes; B1 Definition; B2 Drawing structures; B3 Nomenclature; Section C - Functional groups; C1 Recognition of functional groups; C2 Aliphatic and aromatic functional groups; C3 Intermolecular bonding; C4 Properties and reactions; C5 Nomenclature of compounds with functional groups C6 Primary, secondary, tertiary and quaternary nomenclature Section D - Stereochemistry; D1 Constitutional isomers; D2 Configurational isomers - alkenes and cycloalkanes; D3 Configurational isomers - optical isomers; D4 Conformational isomers; Section E - Nucleophiles and electrophiles; E1 Definition; E2 Charged species; E3 Neutral inorganic species; E4 Organic structures; Section F - Reactions and mechanisms; F1 Reactions; F2 Mechanisms; Section G - Acid-base reactions; G1 Brønsted-Lowry acids and bases; G2 Acid strength; G3 Base strength; G4 Lewis acids and bases; G5 Enolates Section H - Alkenes and alkynes H1 Preparation of alkenes and alkynes; H2 Properties of alkenes and alkynes; H3 Electrophilic addition to

symmetrical alkenes; H4 Electrophilic addition to unsymmetrical alkenes; H5 Carbocation stabilization; H6 Reduction and oxidation of alkenes; H7 Hydroboration of alkenes; H8 Electrophilic additions to alkynes; H9 Reduction of alkynes; H10 Alkylation of terminal alkynes; H11 Conjugated dienes; Section I - Aromatic chemistry; I1 Aromaticity; I2 Preparation and properties; I3 Electrophilic substitutions of benzene; I4 Synthesis of monosubstituted aromatic rings I5 Electrophilic substitutions of monosubstituted aromatic rings I6 Synthesis of di- and trisubstituted aromatic rings; I7 Oxidation and reduction; Section J - Aldehydes and ketones; J1 Preparation; J2 Properties; J3 Nucleophilic addition; J4 Nucleophilic addition - charged nucleophiles; J5 Electronic and steric effects; J6 Nucleophilic addition - nitrogen nucleophiles; J7 Nucleophilic addition - oxygen and sulfur nucleophiles; J8 Reactions of enolate ions; J9 -Halogenation; J10 Reduction and oxidation; J11 , -Unsaturated aldehydes and ketones Section K - Carboxylic acids and carboxylic acid derivatives K1 Structure and properties; K2 Nucleophilic substitution; K3 Reactivity; K4 Preparations of carboxylic acids; K5 Preparations of carboxylic acid derivatives; K6 Reactions; K7 Enolate reactions; Section L - Alkyl halides; L1 Preparation and physical properties of alkyl halides; L2 Nucleophilic substitution; L3 Factors affecting SN2 versus SN1 reactions; L4 Elimination; L5 Elimination versus substitution; L6 Reactions of alkyl halides; L7 Organometallic reactions; Section M - Alcohols, phenols, and thiols; M1 Preparation of alcohols M2 Preparation of phenols

Sommario/riassunto

Instant Notes in Organic Chemistry, Second Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts?an ideal revision checklist?followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams.
