Sommario/riassunto	Over the past two decades, the percentage of the world's population

living on less than a dollar a day has been cut in half. How much of that improvement is because of or in spite of globalization? While anti-globalization activists mount loud critiques and the media report breathlessly on globalization's perils and promises, economists have largely remained silent, in part because of an entrenched institutional divide between those who study poverty and those who study trade and finance. Globalization and Poverty bridges that gap, bringing together experts on both
