                    About the Author

   Sommario/riassunto   Beginning with the anthropological linguistic tradition associated
                    primarily with the names of Franz Boas, Edward Sapir and their
                    students and concluding with the work of Noam Chomsky and William
                    Labov at the end of the century. This book offers a comprehensive
                    account of essential periods and areas of research in the history of
                    American Linguistics and also addresses contemporary debates and
                    issues within linguistics.Topics covered include: * The sources of the
