Sommario/riassunto	In this long-awaited book, Antony Duff offers a new perspective on the structures of criminal law and criminal liability. His starting point is a distinction between responsibility (understood as answerability) and liability, and a conception of responsibility as relational and practice-based. This focus on responsibility, as a matter of being answerable to those who have the standing to call one to account, throws new light on a range of questions in criminal law theory: on the question of criminalisation, which can now be cast as the question of what we should have to answer for, and to whom, under the threat of criminal

conviction and punishment; on questions about the criminal trial, as a process through which defendants are called to answer, and about the conditions (bars to trial) given which a trial would be illegitimate; on questions about the structure of offences, the distinction between offences and defences, and the phenomena of strict liability and strict responsibility; and on questions about the structures of criminal defences. The net result is not a theory of criminal law; but it is an account of the structure of criminal law as an institution through which a liberal polity defines a realm of public wrongdoing, and calls those who perpetrate (or are accused of perpetrating) such wrongs to account

Sommario/riassunto	This briskly told history of Reformed Protestantism takes these churches through their entire 500-year history-from sixteenth-century Zurich and Geneva to modern locations as far flung as Seoul and São Paulo. D. G. Hart explores specifically the social and political developments that enabled Calvinism to establish a global presence. Hart's approach features significant episodes in the institutional history of Calvinism that are responsible for its contemporary profile. He traces the political and religious circumstances that first created space for Reformed churches in Europe and later contributed to Calvinism's expansion around the world. He discusses the effects of the American and French Revolutions on ecclesiastical establishments as well as

nineteenth- and twentieth-century communions, particularly in Scotland, the Netherlands, the United States, and Germany, that directly challenged church dependence on the state. Raising important questions about secularization, religious freedom, privatization of faith, and the place of religion in public life, this book will appeal not only to readers with interests in the history of religion but also in the role of religion in political and social life today.
