| Sommario/riassunto             | Ascriptions of mental states to oneself and others give rise to many<br>interesting logical and semantic problems. Attitude Problems presents<br>an original account of mental state ascriptions that are made using<br>intensional transitive verbs such as 'want', 'seek', 'imagine', and<br>'worship'. Forbes offers a theory of how such verbs work that draws on<br>ideas from natural language semantics, philosophy of language, and<br>aesthetics ;Ascriptions of mental states to oneself and others give<br>rise to many interesting logical and semantic problems.
