Sommario/riassunto

The third in a series that explores cultural and ethical values in
Classical antiquity, this volume examines the dichotomy between 'city'
and 'country' in ancient Greek and Roman cultures. Fourteen papers
address a variety of topics on this theme, and include a variety of
methodological approaches—archaeological, iconographic, literary and
philosophical. The book demonstrates that, despite a common rhetoric
of polarity in antiquity that tended to construct city and countryside as
very distinct, oppositional categories, there was far less consistency
(and far more nuance) about the ideologies felt to inhere in each.

Sommario/riassunto	This book gathers the proceedings of the 7th IFToMM International Conference on Mechanisms, Transmissions, and Applications (MeTrApp), held in Taoyuan City, Taiwan, on September 1–3, 2025; this book covers topics such as mechanism and machinery design, parallel manipulators, robotics and mechatronics, control applications, mechanical transmissions, cam and gear mechanisms, and dynamics of machinery. MeTrApp provided researchers, scientists, industry experts, and graduate students from around the globe with a platform to share their cutting-edge work on mechanisms, transmissions, and their applications. The proceedings extend this platform to all researchers, scientists, industry experts, and students interested in these fields.
