

1. Record Nr.	UNINA9910451021703321
Titolo	Legal knowledge and information systems [[electronic resource]] : JURIX 2005 : the eighteenth annual conference // edited by Marie-Francine Moens and Peter Spyns
Pubbl/distr/stampa	Amsterdam ; ; Washington, D.C., : IOS Press Fairfax, VA, : Distributor in the USA and Canada, c2005
ISBN	1-280-50515-X 9786610505159 1-4237-9731-0 1-60750-152-X 600-00-0475-3 1-60129-132-9
Descrizione fisica	1 online resource (172 p.)
Collana	Frontiers in artificial intelligence and applications ; ; v. 134
Altri autori (Persone)	MoensMarie-Francine <1957-> SpynsPeter
Disciplina	343.0999
Soggetti	Artificial intelligence Law - Methodology - Automation Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Proceedings of the conference held Dec. 8-10, 2005, at the Vrije Universiteit Brussel in Brussels, Belgium.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Title page; Preface; Contents; Theory and Practice in AI and Law: A Response to Branting; Norm Modifications in Defeasible Logic; Making Sense of Coherence: The Level Theory of Coherence; Mixing Legal and Non-Legal Norms; Regulations Expressed as Logical Models (REALM); Assumption Based Peg Unification for Crime Scenario Modelling; Dynamics of Rule Revision and Strategy Revision in Legislative Games; Automated Analysis of Reasoning and Argumentation Structures in Texts; Automatic Translation from Textual Representations of Laws to Formal Models Through UML Some Foundational Linguistic Elements for QA Systems: An Application to E-Government ServicesA Question Answer System for Legal Information Retrieval; How Technology Can Help Reducing the Legal

Burden; A Semantics-Based Visual Framework for Planning a New Bill; The Desocialization of the Courts, Sentencing Decision Support and Plea Bargaining; Towards Modeling Systematic Interpretation of Codified Law; Large-Scale Linguistic Ontology as a Basis for Text Categorization of Legislative Documents; Game Mechanisms & Procedural Fairness; Practical Reasoning and Proposing: Tools for e-Democracy
The Legal Concepts and the Layman's Terms
Validating an Automated Evaluation Procedure for Ontology Triples in the Privacy Domain; An Ontological Approach for the Management of Rights Data Dictionaries; Using Legal Definitions to Increase the Accessibility of Legal Documents; Previous Publications by JURIX; Author Index

Sommario/riassunto

e-government applications are gaining ground among local, national, European and international institutions. However, there is a need for the integration and harmonisation of the models. For a marriage between artificial intelligence and e-government to happen, technologies that automatically extract knowledge from natural language are needed.
