Sommario/riassunto	This book reviews Latin America's experience with infrastructure reform over the last fifteen years. It argues that the region's infrastructure has suffered from public retrenchment and unrealistic expectations about private involvement. Poor infrastructure now hampers productivity, growth, and poverty reduction. Addressing this requires more and better spending, and acceptance that governments remain central to infrastructure provision and supervision, although the private sector still has an important role to play.

2. Record Nr.	UNINA9910559398603321
Titolo	China's publishing industry in the era of big data / / Li Zhang [and three others]
