

1. Record Nr.	UNINA9910451032003321
Autore	Pratt H. Douglas (Harold Douglas), <1944->
Titolo	The Hawaiian honeycreepers [[electronic resource]] : Drepanidinae // H. Douglas Pratt ; colour plates, drawings, and photographs by the author ; bird photographs by Jack Jeffrey ; with an appendix by Sheila Conant
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2005
ISBN	1-281-34630-6 9786611346300 0-19-152403-4
Descrizione fisica	1 online resource (393 p.)
Collana	Bird families of the world ; ; 12
Disciplina	598.8
Soggetti	Drepanididae Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [291]-333) and index.
Nota di contenuto	Contents; List of colour plates; List of abbreviations; Plan of the book, names and terms; Honeycreeper Topography; Frequently mispronounced words of Hawaiian origin; PART I: General chapters; PART II: Species accounts; Appendix 1: Honeycreepers in Hawaiian material culture; Appendix 2: Scientific names and families of plants mentioned in the text; Appendix 3: Scientific names, families, and subfamilies of non-Hawaiian birds mentioned in the text; Bibliography; Index
Sommario/riassunto	This book is the most up to date work on honeycreepers, covering the life history, relationships, and biology of the birds. The honeycreepers, with their bright colouration and canary-like songs, are famed for their unique evolutionary history as a geographically isolated group that has undergone a spectacular burst of adaptations to the islands of the Hawaiian archipelago. - ;The Hawaiian Honeycreepers are typified by nectar feeding, their bright colouration, and canary-like songs. They are considered one of the finest examples of adaptive radiation, even more diverse than Darwin's Galapagos fi
