Sommario/riassunto	This book addresses important findings, assumptions, problems, hopes, and future guidelines on the use of advanced research techniques to study the moment-by-moment mental processes that occur while a reader or listener is understanding language. The core techniques are eye tracking and ERPs, with some extensions to others such as fMRI. The On-line Study of Sentence Comprehension has been written by top researchers in the field of psycholinguistics, who are also leading experts in the use of eye tracking and ERPs. This book combines comprehensive overviews of the state of th
