

1. Record Nr.	UNINA9910451113403321
Autore	Pace Betty
Titolo	Renaissance of sickle cell disease research in the genome era [[electronic resource] /] / Betty Pace
Pubbl/distr/stampa	London, : Imperial College Press Hackensack, NJ, : Distributed by World Scientific Pub., c2007
ISBN	1-281-12051-0 9786611120511 1-86094-796-4
Descrizione fisica	1 online resource (394 p.)
Disciplina	616.1527
Soggetti	Sickle cell anemia Genomics Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; PART I: THE HUMAN GENOME ERA, A HISTORIC PERSPECTIVE; PART II: CLINICAL RESEARCH PERSPECTIVES; PART III: BASIC RESEARCH PERSPECTIVES; PART IV: COMMUNITY PERSPECTIVES; Contributors; Foreword Francis S. Collins and Alan E. Guttmacher; Acknowledgments; Introduction . . .The Journey Inward Betty S. Pace; 1. Sickle Cell Disease: Demystifying the Beginnings Clarice Reid and Griffin Rodgers; 2. Sponsorship of Sickle Cell Disease Research by the National Institutes of Health: A Brief History and Projections for the Future Gregory L. Evans and David G. Badman 3. The Human Genome Project Betty S. Pace4. Sickle Cell Disease: A Phenotypic Patchwork Kim Smith-Whitley and Betty S. Pace; 5. Preventive Care and Advances in the Treatment of Sickle Cell Disease Charles T. Quinn and George R. Buchanan; 6. Sickle Cell Disease in Adults Johnson Haynes, Jr. and Ardie Pack-Mabien; 7. Pain in Sickle Cell Disease: A Multidimensional Construct Lennette J. Benjamin and Richard Payne; 8. Transfusion Therapy in Sickle Cell Disease Carolyn Hoppe, Robert Adams and Elliot Vichinsky; 9. Hemoglobin S Polymerization, Just the Beginning Frank A. Ferrone

10. Damage to the Red Blood Cell Membrane in Sickle Cell Disease Steven R. Goodman and Clinton Joiner
11. Fetal Hemoglobin for What Ails Sickle Hemoglobin Solomon F. Ofori-Acquah and Betty S. Pace; 12. Genetic Modulation of Sickle Cell Disease Martin H. Steinberg and Sweet Lay Thein; 13. Molecular Framework of Hemoglobin Switching Steven Fiering; 14. Dynamic Nucleoprotein Structure of the β -Globin Locus: Establishing a Rational Molecular Basis for Therapeutic Modulation of 15. Vertebrate Models for Sickle Cell Disease Research Barry H. Paw, Seong-Kyu Choe, Flavia C. Costa, Shirin V. Sundar and Kenneth Peterson
16. Stem Cell Biology Wei Li and Alan W. Flake; 17. Bone Marrow Transplantation Robert I. Raphael and Mark C. Walters; 18. Genetically Engineered Cures: Gene Therapy for Sickle Cell Disease Punam Malik and Philippe Leboulch; 19. Sickle Cell Disease: The Past, Present and Future Social and Ethical Dilemmas Vence L. Bonham, Jr., Carlton Haywood, Jr. and Vanessa Northington Gamble
20. It Takes a Village to Cure Sickle Cell Disease Rosie Peterson and Denise Davis-Maye
21. Beyond National Borders: A Global Perspective on Advances in Sickle Cell Disease Research and Management, and New Challenges in the Genome Era Solomon F. Ofori-Acquah and Kwaku Ohene-Frempong; Index

Sommario/riassunto

The Human Genome Project has spawned a Renaissance of research faced with the daunting expectation of personalized medicine for individuals with sickle cell disease in the Genome Era. This book offers a comprehensive and timeless account of emerging concepts in clinical and basic science research, and community concerns of health disparity to educate professionals, students and the general public about meeting this challenging expectation. Contributions from physicians, research scientists, scientific administrators and community workers make Renaissance of Sickle Cell Disease Research in the
