Note generali	Papers presented at a conference held at Williamsburg, Va., Sept. 20-21, 1984, sponsored by the National Bureau of Economic Research.
Nota di bibliografia	Includes bibliographies and index.
Nota di contenuto	Front matter -- Contents -- Acknowledgments -- Financing Corporate Capital Formation: An Introduction and Overview -- 1. Have U.S. Corporations Grown Financially Weak? -- 2. Debt and Equity Returns Revisited -- 3. Risk and Required Returns on Debt and Equity -- 4. Implications of Government Deficits for Interest Rates, Equity Returns, and Corporate Financing -- 5. Valuing Financial Flexibility -- 6. The Economic Effects of the Corporate Income Tax: Changing Revenues and Changing Views -- Contributors -- Index
Sommario/riassunto	Six leading economists examine the financing of corporate capital formation in the U.S. economy. In clear and nontechnical terms, their papers provide valuable information for economists and nonspecialists interested in such questions as why interest rates are so high, why corporate debt has accelerated in recent years, and how government debt affects private financial markets. Addressing these questions, the contributors focus chiefly on three themes: the actual use of debt and equity financing by corporations in recent years; the factors that drive

the financial markets' pricing of debt and equity securities; and the relationship between corporations' real investment decisions and their financial decisions. While some of the papers are primarily expository, others break new ground. Extending his previous work, Robert Taggart finds a closer relationship between corporate and government debt than has been supposed. Zvi Bodie, Alex Kane, and Robert McDonald conclude in their study that the volatility of interest rates under the Volcker regime has led to a rise in real interest rates because of investors' demand for a greater risk premium. All of the papers present empirical findings in a useful analytical framework. For its new findings and for its expert overview of issues central to an understanding of the U.S. economy, *Financing Corporate Capital Formation* should be of both historical and practical interest to students of economics and practitioners in the corporate and financial community.

**Sommario/riassunto**

Laura Pulido traces the roots of third world radicalism in Southern California during the 1960's and 1970's in this accessible, wonderfully illustrated comparative study. Focusing on the Black Panther Party, El Centro de Acción Social y Autonomo (CASA), and East Wind, a Japanese American collective, she explores how these African American, Chicana/o, and Japanese American groups sought to realize their ideas about race and class, gender relations, and multiracial alliances. Based on thorough research as well as extensive interviews, Black, Brown, Yellow, and Left explores the differences and similarities between these organizations, the strengths and weaknesses of the third world left as a whole, and the ways that differential racialization led to distinct forms of radical politics. Pulido provides a masterly, nuanced analysis of complex political events, organizations, and experiences. She gives special prominence to multiracial activism and includes an engaging account of where the activists are today, together with a consideration of the implications for contemporary social justice organizing.
