Sommario/riassunto	Bioluminescence and chemiluminescence are among the most important technologies in the life sciences. This latest volume of the

long-running biannual Bioluminescence and Chemiluminescence symposium series presents the latest developments in the fundamental and applied aspects of bioluminescence and chemiluminescence. The book covers the fundamental aspects of bioluminescence, including beetle, marine bacterial and Cypridina bioluminescence, and the fundamental aspects of chemiluminescence, including 1,2-dioxetanes. It also presents recent developments in instrumentation and devices and a wide
