   Sommario/riassunto   This innovative reader brings together classic theoretical texts and
                        cutting-edge ethnographic analyses of specific state institutions,
                        practices, and processes and outlines an anthropological framework for
                        rethinking future study of "the state". Focuses on the institutions,
                        spaces, ideas, practices, and representations that constitute the "state".
                        Promotes cultural and transnational approaches to the subject. Helps
                        readers to make anthropological sense of the state as a cultural
                        artifact, in the context of a neoliberalizing, transnational world.
