Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Cover; CONTENTS; EDITORIAL ADVISORY BOARD; Guest editorial; The impact of ownership concentration, and identity on company performance in the US and in Central and Eastern Europe; Evaluating performance of Nordic and Baltic stock exchanges; The internationalization of family SME; Under what conditions do subsidiaries learn?; Individual correlates of organizational commitment and intention to leave the organization; Improving motivation among health care workers in private health care organizations; Book review
Sommario/riassunto	Management research has a long tradition rooted in the early 20th century of the Western hemisphere, but as Hofstede has put it, "in a global perspective, US management theories contain several idiosyncrasies not necessarily shared elsewhere." The rise of Japanese management and "postmodern" organizations in China and Korea has led to more diversity in management practice and research. Moreover, with the fall of the iron curtain, new developments in the management of the "East European capitalism" may also contribute to other and

Autore	Anna Rudawska
Titolo	Abrasive Technology : Characteristics and Applications / / edited by Anna Rudawska
Pubbl/distr/stampa	IntechOpen, 2018 London, United Kingdom : , : IntechOpen, , 2018
ISBN	1-83881-680-1 1-78984-194-1
Descrizione fisica	1 online resource (212 pages) : illustrations some color
Disciplina	621.92
Soggetti	Abrasives Manufactures
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	The subject matter of this book is the information on the abrasive technology methods, the characteristics of the methods (for example, the technological parameters, tools, and machines), innovative methods, characteristics of surface structure and surface properties after this type of mechanical process, and application in various industrial branches and other technical and technological domains. Abrasive technology is very important, for example, in precision component manufacturing and nano-technology devices. The aim of this book is to present information on the characteristics and applications of abrasive technology, abrasive tools, tests, and also the innovative methods of this technology. This information enables scientists, engineers, and designers to ensure the soundness and integrity of the fabricated components and to develop new techniques effectively.
