Sommario/riassunto	This book contains a wide spectrum of articles which report the current

research progress in topics concerning the dynamics of multiparticle production in high energy collision processes, with emphasis on nonperturbative aspects of QCD. The topics covered are: the phase diagram of QCD and related transitions; correlations and fluctuations in a variety of experiments involving multiparticle production (e+e- annihilation, pp collisions and heavy ion collisions); recent theoretical and experimental developments in interferometry and particle correlations; event-by-event fluctuations in high energy

Titolo	A vindication of foure serious questions of grand importance [[electronic resource]] : concerning excommunication and suspention from the sacrament of the Lords Supper, from some misprisions and unjust exceptions lately taken against them; both in the pulpit, by a reverend brother of Scotland, in a sermon at Margarets Church in Westminster, before the Honourable House of Commons, at a publike fast there held for Scotland, on the 5th of September last: and in the presse, by three new-printed pamphlets, by way of answer to, and censure of them. Wherein some scripture texts, (commonly reproduced for excommunication, and bare suspention from the Lords Supper onely,) are cleared from false glosses, inferences, conclusions wrested from them; ... // By William Prynne of Lincolns Inne, Esquire
