

1. Record Nr.	UNINA9910451350703321
Titolo	The biogeochemistry of the Amazon Basin [[electronic resource] /] / edited by Michael E. McClain, Reynaldo L. Victoria, Jeffrey E. Richey
Pubbl/distr/stampa	New York, : Oxford University Press, 2001
ISBN	0-19-756114-4 1-280-76141-5 9786610761418 0-19-535423-0
Descrizione fisica	1 online resource (378 p.)
Collana	Oxford scholarship online
Altri autori (Persone)	McClainMichael E RicheyJeffrey Edward <1946-> VictoriaReynaldo L
Disciplina	577/.14/09811
Soggetti	Biogeochemistry - Amazon River Watershed Electronic books. Amazon River
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previously issued in print: 2001.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents; 1 The Relevance of Biogeochemistry to Amazon Development and Conservation; 2 General Characteristics and Variability of Climate in the Amazon Basin and its Links to the Global Climate System; 3 The Atmospheric Component of Biogeochemical Cycles in the Amazon Basin; 4 Soil versus Biological Controls on Nutrient Cycling in Terra Firme Forests; 5 Nutrient Cycling as a Function of Landscape and Biotic Characteristics in the Cerrados of Central Brazil; 6 Linking Biogeochemical Cycles to Cattle Pasture Management and Sustainability in The Amazon Basin 7 Nutrient Considerations in the Use of Silviculture for Land Development and Rehabilitation in the Amazon8 Extractive Reserves and Participatory Research as Factors in the Biogeochemistry of the Amazon Basin; 9 The Recovery of Biomass, Nutrient Stocks, and Deep-Soil Functions in Secondary Forests; 10 The Interface Between Economics and Nutrient Cycling in Amazon Land Development; 11 Carbon Storage in Biomass and Soils; 12 Terrestrial Inputs to Amazon

Streams and Internal Biogeochemical Processing

13 Geo-ecological Controls on Elemental Fluxes in Communities of Higher Plants in Amazonian floodplains
14 Biogeochemistry of Amazon Floodplain Lakes and Associated Wetlands;
15 Organic Matter and Nutrients in the Mainstem Amazon River;
16 Trace Elements in the Mainstem Amazon River;
17 Biogeochemical Processes on the Amazon Shelf: Changes in Dissolved and Particulate Fluxes During River/Ocean Mixing; Index

Sommario/riassunto

This study examines the flows of water, carbon, nutrients and other bioactive elements through Amazon terrestrial and aquatic ecosystems.
