

1. Record Nr.	UNINA9910451380703321
Autore	McMahon April M. S
Titolo	Language classification by numbers [[electronic resource] /] / April McMahon and Robert McMahon
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2005
ISBN	1-280-75849-X 9786610758494 0-19-153536-2 1-4294-7088-7
Descrizione fisica	1 online resource (284 p.)
Collana	Oxford linguistics
Altri autori (Persone)	McMahonRobert <1964->
Disciplina	401/.2
Soggetti	Language and languages Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [241]-253) and index.
Nota di contenuto	Contents; List of Figures; List of Tables; 1 How do Linguists Classify Languages?; 2 Lexicostatistics; 3 Tree-based Quantitative Approaches: Computational Cladistics; 4 Tree-based Quantitative Approaches: Sublists; 5 Correlations Between Genetic and Linguistic Data; 6 Climbing Down from the Trees: Network Models; 7 Dating; 8 Quantitative Methods Beyond the Lexicon; References; Index
Sommario/riassunto	This book considers how languages have traditionally been divided into families, and asks how they should be classified in the future. It tests current theories and hypotheses, shows how new ideas can be formulated, and offers a series of demonstrations that the new techniques applied to old data can produce convincing results. It will be of great practical interest to all those concerned with the classification and diffusion of languages in fields such as comparative linguistics,. archaeology, genetics, and anthropology. - ;This book considers how languages have traditionally been divided int
