| Nota di bibliografia    | Includes bibliographical references and index.  |
| Nota di contenuto       | Preface; Acknowledgements; 1 Basic Concepts of Decisionmaking in Pest Management; 2 Basic Concepts of Sampling for Pest Management; 3 Classifying Pest Density; 4 Distributions; 5 Sequential Sampling for Classification; 6 Enhancing and Evaluating the Usefulness of Sampling Plans; 7 Binomial Counts; 8 Multiple Sources of Variation; 9 Resampling to Evaluate the Properties of Sampling Plans; 10 Sampling over Time to Classify or Estimate a Population Growth Curve; 11 Monitoring Pest Populations through Time; 12 Epilogue; Glossary; Index |
| Sommario/riassunto      | This text covers the statistical concepts of sampling in agricultural pest management, showing how to obtain sample data from the field and how to use the data in decision-making. Only minimal mathematical expertise is assumed, and worked examples using Mathcad are included.   |

| Sommario/riassunto      | To celebrate the 270th anniversary of the De Gruyter publishing house,<br>the company is providing permanent open access to 270 selected<br>treasures from the De Gruyter Book Archive. Titles will be made<br>available to anyone, anywhere at any time that might be interested. The<br>DGBA project seeks to digitize the entire backlist of titles published<br>since 1749 to ensure that future generations have digital access to the<br>high-quality primary sources that De Gruyter has published over the<br>centuries. |
