Sommario/riassunto   This volume is an attempt to analyse the causes of violent conflict in Africa, to review the various approaches to conflict prevention and conflict resolution and to discuss some of the practical difficulties in ending violence. It brings together a wide range of scholars and practitioners, with specialist knowledge of a large number of African countries. The intention here is to provide a survey of the various approaches to conflict in Africa, a systematic discussion of some of the root causes of violence, as well as case studies on the consequences of violence and the effects of conflict resolution.
