Sommario/riassunto	This volume consists of a collection of twelve empirical studies that address theoretical and practical issues relating to pilgrimage and tourism activities in late modernity. As a contribution to the Religion and Social Order series sponsored by the Association for the Sociology of Religion, these studies are particularly directed to assessing both the role of religion in the pilgrimage/tourism nexus and the ways in which religious expressions have changed as a result of the technological and social changes of late modernity that affect human behavior in a more general sense. The chapters address neo-pagan pilgrimage tours to ancient pagan temples, travels to spiritual healers, the development of historical sites by American religious movements of nineteenth-century origin, labyrinths, pilgrimages that emphasize walking a journey rather than visiting buildings, virtual pilgrimage, the Roman Jubilee of 2000, Kyoto's Gion Festival, and similar topics.

Sommario/riassunto	Mimetic words, also known as 'sound-symbolic words', 'ideophones' or more popularly as 'onomatopoeia', constitute an important subset of the Japanese lexicon; we find them as well in the lexicons of other Asian languages and sub-Saharan African languages. Mimetics play a central role in Japanese grammar and feature in children's early utterances. However, this class of words is not considered as important in English and other European languages. This book aims to bridge the gap between the extensive research on Japanese mimetics and its availability to an international audience, and also to provide a better understanding of grammatical and structural aspects of sound-

symbolic words from a Japanese perspective. Through the accounts of mimetics from the perspectives of morpho-syntax, semantics, language development and translation of mimetic words, linguists and students alike would find this book particularly valuable.
