Resources; Subject Index; Author Index;

**Sommario/riassunto**

Maintaining a connection to nature is increasingly recognised as an important component of caring for a person with dementia. The benefits of connecting the subjective experience of dementia sufferers with their physical environment include sensory stimulation and enhanced cognitive, psychological and physical well-being, as well as improved behaviour management. Design for Nature in Dementia Care adopts a holistic and person-centred approach to caring for dementia sufferers by considering their emotional, psychological and spiritual well-being. The book provides comprehensive examples of the

## Sommario/riassunto

Brexit Negotiations after Article 50: Assessing Process, Progress and Impact brings together contributors from academia, politics and practice to discuss and debate the progress (or lack of) to date since the Prime Minister, Theresa May, enacted the Article 50 process to leave the EU on 29th March 2017. This collection is split into two key areas of inquiry. The first section explores the process of Brexit and the multifaceted aspects of the Article 50 process, examining the arguments for and against membership of the European Union. The second section develops the arguments within the first section by providing thematic chapters on the likely impact of Brexit on particular sectors of the UK economy, namely: the financial services sector; SMEs and related supply chain issues; and, the automotive sector (as an emblematic sector for UK manufacturing). The book will make a unique contribution to the debate on Brexit as it brings together academics and practitioners from both a 'Remain' and 'Leave' persuasion, including Sir Bernard Jenkin, MP, economist Vicky Pryce and philosopher AC Grayling.
