Sommario/riassunto	Developing countries are rapidly urbanizing and most of the world's population will soon be living in cities, making it crucial to examine how cities can be developed on a sustainable basis. Japan is one of the most urbanized countries in the world and offers a remarkable series of lessons for sustainable urban planning. This book draws

together experts from engineering, humanities, social sciences and mental health to introduce Japanese experiences and compare them with international research. Rapid urbanization has damaged natural and human systems in Japan and many planners are seiz
